These men and women are fathers, sons and brothers, sorely missed by their families and friends. They are non-violent and pose zero threat to communities. The sentences they received are disproportionate to the victimless cannabis crimes committed. State by state, laws in support of cannabis use are rapidly sweeping the nation. There are many scientifically proven benefits of the cannabis plant. While the country advances in the cannabis industry, providing opportunities for large incomes, our prisoners remain behind bars and you are the only one that can save them! We believe you are the President that will show compassion when considering commutation and release all non-violent cannabis prisoners. Thank you for your time and consideration. Sincerely,
